Portfolio: <https://madxxi.github.io/adam-portfolio/>

Senior Incident Manager | Major Incident Response & SRE Leadership

Incident Commander and Site Reliability Engineer with 20+ years at Amadeus IT Group, one of the world's largest travel solutions providers, serving as Incident Commander from 2013 through 2026, including a formal Incident Commander title (2013–2018) and continued incident command responsibility through 2026 as SRE. Commanded 36+ Sev-1/Sev-2 incidents per year across 460+ interdependent applications, coordinating 10–20+ application, infrastructure, and Microsoft vendor teams per incident and owning communications from engineers to executives and customers. Sustained a 196–200/200 Service Stability Index for 12 consecutive years with sub-20-minute MTTR on critical outages. Ran a blameless postmortem for Sev-1/Sev-2, reducing repeat incidents and change failure rate for 95%+ cases handled. ITIL, ServiceNow; U.S. Army veteran.

PROJECTS

- ***Spearheaded a JIRA EPIC to enhance, consolidate, and standardize Cloud alerts:***
 - Presented to the organization's Development Department a model for standardized alerts (templates) to be used by the entire support organization and helped maintain these to adapt them to all levels required.
 - Spearheaded coordination to migrate alert events from internal "alerting system" into ServiceNow.
 - Pioneered, after "as-code" templates were created, to extend and amend standard alerts as needed (written in GO) using queries in PromQL via Thanos to trigger those alerts and building on-the-fly Grafana dashboards.

PROFESSIONAL EXPERIENCE

AMADEUS Global Operations Americas Inc.

Sr. Service Reliability Engineer (SRE) - Cloud Technologies,

2019 – 2026

Fully Remote Mar 2020 – May 2023 / Hybrid Jun 2023 - Mar 2026

- Served as Incident Commander for 36 Sev-1/Sev-2 incidents per year across 460+ interdependent travel applications, coordinating 10–20+ application, infrastructure, and Microsoft vendor teams per incident and delivering structured updates to engineering leadership, executives, and customers through resolution.
- Ran a blameless postmortem for every Sev-1/Sev-2, identifying recurring failure patterns and driving corrective actions that reduced repeat incidents and lowered change failure rate for over 95% of cases handled.
- Maintained a 196–200/200 Service Stability Index (SSI), Amadeus's internal reliability scorecard tied to MTTR, for 12 consecutive years (2013–2025), resolving 95%+ of incidents within target: sub-20-minute MTTR on critical outages and sub-30-minute on degradations.
- Led an organization-wide initiative that moved legacy proprietary alerting into ServiceNow-based ITIL event and incident management (adopted globally in 2021), building 100+ templated Prometheus/Thanos (PromQL) alert rules with Grafana dashboards and Microsoft Teams integration; cut alert noise 50% and on-calls ~250/week.
- Served as primary incident management trainer, onboarding 25+ engineers as official instructor for the Amadeus Cloud Services (ACS) curriculum (ACS Induction; ACS Incidents and Recovery) and shortening new-hire time to operational readiness from 12 to 2 weeks.
- Reduced average troubleshooting time on complex incidents by 15% by introducing AIOps practices, including AI-assisted diagnosis (GitHub Copilot, Claude, GPT-4) and RAG-based retrieval over Confluence runbooks and operational procedures; cut runbook creation for new ServiceNow alert types from 2 hours to 15 minutes.
- Led the multi-phase migration of 400+ applications and 2,600 Linux hosts from physical to virtual infrastructure, then to private Red Hat OpenShift and public Microsoft Azure, with zero customer-facing downtime.

Amadeus IT Group, S.A.

Lead Systems Engineer (UNIX/Linux),

2008 - 2019

Sr. Systems Engineer,

2005 - 2008

- Served as technical lead for a global 24/7 team of 9 engineers without formal reporting authority, leading incident response for reservation and ticketing platforms serving airlines, agencies, and hotels; provided performance assessments that fed formal review cycles, mentored 18 engineers into senior roles over 10 years, and cut team turnover by 25%.
- Served as Incident Commander (2013–2018) for ~15 major production incidents per year, directing cross-team response and real-time decisions, and owning communications and escalation to technical teams, leadership, and business stakeholders through resolution.
- Led ITIL incident, problem, and change management with root-cause analysis and preventive actions across thousands of production systems, reducing repeat incidents by 95% and change-related outages by 90%.
- Owned operational stability for a €2.7B revenue-supporting environment of 5,500+ production and test systems, operating multi-continent high-availability clusters (Veritas Cluster Server, MC/ServiceGuard, HP-UX, Linux) and leading 250 major OS and database upgrades while sustaining 99.99% uptime on clustered production services; supported 10 Oracle migrations with zero data loss.
- Developed Perl, shell, and PHP monitoring and recovery tools that eliminated ~20 hours/week of manual checks and sped incident detection; the tooling was showcased at sites in France and England and led to the formation of a dedicated alerting and monitoring team in 2014.
- Resolved high-volume IBM MQ messaging incidents using BMC PATROL and internal tooling, sustaining a verified success rate for core business message flows.

EDUCATION & CERTIFICATIONS

Masters of Executive Management in Business Administration (EMBA): University of Florida, 2013

Masters of Computer Information Systems (MIS): Nova Southeastern University, FL, 2007

Certifications: AZ Fundamentals, FinOPs Foundation, AZ Data Fundamentals, SAFe 5 Practitioner, ITIL

Pursuing: HashiCorp Terraform Associate, AWS Certified SysOps Administrator

TECHNICAL SKILLS

- **Cloud Platforms:** Azure & RH Openshift : Kubernetes (v1.27.x)/ OpenShift (v4.1x)
- **Cloud & IaC (Self-Directed / Portfolio Projects):** AWS (EC2, S3, IAM), Terraform, hands-on via personal observability and infrastructure projects; certifications in progress
- **Incident, Problem & Change Management:** ITIL, Blameless Post-Incident Reviews, On-Call Rotation, Cap. Planning
- **Databases:** Supported: Oracle, MariaDB,MySQL. Usage of SQL, MySQL, promQL
- **Tools:** Git/Github, JIRA, VMware ESXi, Docker, Kubernetes, BIRD, Deployment Manager, Jenkins pipeline
- **Frameworks:** IT Services Management (ITSM), Scaled Agile Framework (SaFe)
- **Observability and Monitoring:** Thanos, Grafana, Splunk, Prometheus (Datadog-equivalent metrics/alerting stack)
- **Automation & Alerting:** ServiceNow (Service Mgt, incident escalation), Resolve (automation), Jira (Agile)
- **Operating Systems:** Linux RHEL, SuSe Linux, CentOS, Ubuntu, AIX, Solaris, Mac OS, HP/UX Windows
- **Languages:** Unix / Linux Shells Scripts, sed, Awk, PHP, Python, Perl, GO
- **Communications and Documentation:** Atlassian: Confluence & JIRA / MS: SharePoint, Yammer / wiki, Jabber
